ACCUTIVE CYBERSECURITY

Accutive CyberSecurity is comprised of best in class security solutions aimed at addressing today's rapidly changing threat landscape. Through organic growth, Accutive has quickly become one of the nation's leading Security Solution Integrators and Value Added Reseller for PAM, Multi-factor Authentication, IAM, IDaaS, End Point, Encryption, Key Management and more. Accutive is a growing force in the marketplace with a wealth of expertise and experience to support our clients with security advisory, design and implementation capabilities to meet and exceed compliance demands and business objectives. We have an extremely strong track record of delivering IT security and internet technology solutions and have developed certified expert teams along with key partnerships with many leading security technology vendors.

Okta is an enterprise grade identity management service, built from the ground up in the cloud and delivered with an unwavering focus on customer success. With Okta, IT can manage access across any application, person or device.

Centrify's identity and access management solutions stop the breach by securing access to hybrid enterprise through the power of identity services.

Accutive Enterprise Data Masking Reduce data breaches by reducing the risk of disclosing sensitive data that resides in less secure non-production environments, such as testing, training, and development.

Gemalto is the most comprehensive solution offering in the security space supporting 100's of third party solutions that address the ever increasing enterprise security needs from EDGE to CORE.

Cylance is revolutionizing cybersecurity with AI based solutions that predict and prevent execution of advanced threats and malware at the endpoint.

Duo's Trusted Access solution ensures only Trusted Users and Trusted Devices can access protected applications. We verify the users identity and the health of their devices before they connect to the applications you want them to access.

HID Global is the trusted leader in providing access control and secure identity solutions, including smart cards, readers, printers, RFID tags and software.

Securonix is advanced security analytics technology that mines, enriches, analyzes, scores and visualizes customer data into actionable intelligence on the highest risk threats from within and outside their environment.

Venafi, Inc. is a cybersecurity company that develops software to secure and protect cryptographic keys and digital certificates.

PKWARE protects the world's data with smart encryption software and solutions. PKWARE's easy-to-use security armors data itself and eliminates vulnerabilities wherever data is used, shared or stored.

THALES A trusted and recognised global leader in cyber security and defence solutions, Thales defends and protects you against the most sophisticated attacks.
