

Security Solutions

Accutive is a premium integrator and Value Added Reseller of leading industry security solutions. Accutive's team of experienced security professionals will analyze, design and deploy your security solutions along with providing the necessary training and solution documentation to support the ease of ongoing solution management.

Accutive security specialists have worked on a wide array of organizations and understand that there is no one size fits all solution. Every organization is different whether it involves legacy systems, unique platforms or just working with budget and resources constraints. Unlike other IT projects, an Enterprise Security Implementation is a complex task requiring its own unique, specialized skillset and not one you would need to employ on a regular basis.

Our Enterprise Security Specialists will assess the risks and regulatory compliance requirements of your industry to help your team find the best technical solutions available.

Our tailored approach to leveraging the industry's leading and complementary security solutions will:

- Assist with compliance for regulatory guidelines such as FIPS, CC, SOX, PCI, GLBA, SB1386, etc.
- Lower operating costs through the consistent deployment of security policy and procedures
- Improve productivity by optimizing security efforts for efficient management and maintenance
- Provide qualified resources to ensure projects are delivered on-time and on-budget

Let our knowledgeable, experienced professional services team ensure the successful implementation of your enterprise security solutions.

Close The Gap In IT Security By Starting With:

> Identity and Access Management

Identity and Access Management (IAM) has become a mission-critical undertaking to ensure that the right individuals have access to the right information. Ensure your identity and access systems are designed to meet compliance and improve your business's efficiency by automating management in a simple and cost-effective manner.

Talk to us about:

- Public Key Infrastructure (PKI)
- Authentication
- Mobile and BYOD Management
- Management Platforms
- Smart Cards and Readers
- USB and OTP Authenticators

> Data Encryption and Control

Safeguard information assets from intruders and insider threats. Ensure your information protection controls work seamlessly in conjunction with access controls and authentication. Protect only the data that needs to be protected.

Talk to us about:

- Hardware Security Modules
- Application and Database Protection
- Storage Encryption and Security
