getting IT done, so you don't have to

## > VIRTUAL CHIEF INFORMATION SECURITY OFFICER (vCISO) SERVICES

Accutive's vCISO offers four vCISO Packages depending on the organization's business and IT strategic objectives, its current security maturity level, and its security audit and regulatory requirements.

vCISO  
Services

### THE EXECUTIVE vCISO PACKAGE

Personal CISO to Chief Executive Officers

### THE TURNKEY vCISO PACKAGE

For organizations that need the expertise of a CISO, but do not need or cannot afford a full-time CISO

### THE INTERIM vCISO PACKAGE

For organizations that need a vCISO team to kick-start their cybersecurity team for an interim period of time

### THE SUPPORT vCISO PACKAGE

For organizations that need to supplement their in-house cybersecurity with an external vCISO team

### > WHAT IS A VIRTUAL CISO?

A virtual Chief Information Security Officer (vCISO) is an executive consultant who specializes in providing cyber security expertise to leadership teams, business units, and IT Departments to ensure that information security solutions are addressing an organization's security risks and threats.

A virtual CISO may also be known as a fractional CISO or part-time CISO. This means that a fractional CISO works for a fraction of the time and at a fraction of the cost it would take to hire a full-time executive to fill the post. A virtual CISO can be a cost-effective solution for organizations that are in need of security expertise, but do not need or do not warrant another full time C-level executive.

The main value of a vCISO program is that organizations pay only for the CISO services it needs. With the vCISO program, organizations have immediate and ongoing access to a seasoned CISO, who can help organizations avoid costly mistakes when making security decisions.

In addition, through Accutive's vCISO program, the organization is not just hiring a single professional, but instead gains full access to an experienced team of security practitioners and leaders with broad and complementary sets of knowledge, experience and expertise in the areas of security, legal and regulatory compliance, and IT and security Governance.

## BENEFITS

- Protect your business and manage risk
- Immediate security expertise and guidance to your team, executives, security and IT steering committee
- Immediate leadership to manage security incidents and breaches
- Objectivity and independence in decisions
- Ensure legal and regulatory IT compliance
- Leverage and incorporate best practices and industry benchmarks
- Tailored reports with the latest security news, breaches, regulations and how they impact you
- Address security skills gaps
- Optimal solution for organizations that cannot justify a full-time CISO

## > HOW DOES IT ALL WORK?

Customization is the number one criteria to create cybersecurity success for your company – there is not a one-size-fits-all model. Cybersecurity concepts may be constant across verticals and specialties, but their application must be customized for each client based on their specific business context.

Accutive's Virtual Chief Information Security Officer – vCISO – services cover an in-depth line of services customized for each client:

### THE TURNKEY vCISO PACKAGE

Accutive's Turnkey vCISO Package is ideal for business executives who desire to gain a greater understanding of cyber security matters in order to secure the data of their customers and business partners. The objective is to translate technical and complex issues and challenges that can be clearly related to business objectives and operations.

### THE EXECUTIVE vCISO PACKAGE

Accutive's Executive vCISO Package is a personalized service to the Chief Executive Officer (CEO) of organizations to provide you with security intelligence in real-time in order to reduce the risk of negligence and liability resulting from a data breach, security flaws in your organization's business or IT processes, or lack of security oversight in governance, risk, and compliance.

### THE SUPPORT vCISO PACKAGE

Accutive's Support vCISO Package aims at supporting the CISO in implementing their strategic plan. With this package, the Accutive CISO becomes a key advisor to the in-house CISO.

### THE INTERIM vCISO PACKAGE

Accutive's Interim vCISO Package is usually a longer-term assignment for an organization that wishes to set up a brand new security team including eventually recruiting a CISO. This package is best suited for key security and risk management stakeholders in an organization.

Accutive's mission is to operate a best-in-class security program that is a one-stop shop for organizations that understand the criticality of cybersecurity in their day-to-day business. Our one-stop shop is made possible through our well-established Shared Consulting Services Hub that aims at providing:

*The right people, the right skill sets for our clients, based on just-in-time economics.*

## > OTHER CYBER SECURITY SERVICES

## SECURITY OPERATIONAL SERVICES

Accutive's Security Operational Services dives "under the hood" of an organization's information security strategy. Being operational means that Accutive takes a hands-on approach to implementing the core elements of your security program – this approach is the ideal complement to our Cyber vCISO program.

## ENTERPRISE SECURITY SOLUTIONS

Accutive's Enterprise Security Solutions focus on the selection and deployment of enterprise security solutions for your organization. At Accutive, we have established key partnerships with leading security technology manufacturers to provide our Customers with complete tailored solutions. We constantly research and review security solutions that will best meet our clients' security challenges.
